The Feature That Changes Everything

## Your teleprompter should follow your voice, not the other way around.

Traditional teleprompters scroll at a fixed speed. But you don't speak at a fixed speed. You speed up when excited. Slow down for emphasis. Pause to let ideas land.

With every other teleprompter, you're forced to match the machine's rhythm. Speak too slow? You're behind. Pause to think? The text scrolls away. It's supposed to help you sound natural—but it makes you sound robotic.

Speaking

### Voice-Activated Scrolling

Notchie listens to your voice and scrolls the text in real-time as you speak. **Pause to collect your thoughts—the text waits for you.** Speed up during an exciting point—it keeps pace. It's like having a teleprompter that truly understands you.

Speak naturally

Text flows with your voice. Fast, slow, or anywhere in between.

● Voice Sync Active  
Text scrolls as you speak...

■ Paused

■ Pause with confidence  
Take a breath. Emphasize a point. The script waits patiently.

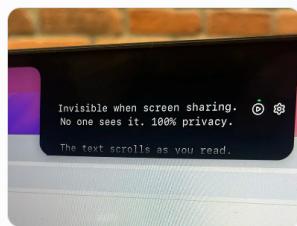

⚡ Never lose your place  
No more scrambling to catch up. The text is always right where you need it.

◀ Prefer classic mode? We've got you.  
Not ready for voice control? No problem. Switch to **auto-scroll mode** with adjustable speed and **instant hover-to-pause**. Just move your mouse over the text to freeze it instantly. Simple, reliable, effective.

Two modes. One goal: **You sound like yourself, not a robot.**

## How it works

Simple by design. Powerful in practice.

### 1. Position

Notchie lives in the dead space of your notch. It occupies screen real estate you never use.

### 2. Read

Text scrolls automatically. Pause with hover, adjust speed with keys. It feels like a natural conversation.

### 3. Stay Hidden

When you share your screen on Zoom or Meet, Notchie is completely invisible to your audience.

## Sound familiar?

The moments that keep professionals up at night

⌚ You're on a video call. Important people are watching. You know exactly what you want to say...

**Then your mind goes blank.**

✖ You glance down at your notes. Your eyes dart away from the camera.

**Everyone notices. You look unprepared.**

💡 OR WORSE...

You're reading directly from your screen, and they can tell. The scanning eyes. The unnatural pauses. The robotic delivery.

*“Were they reading from a script?”*

That's what they're thinking. **Your credibility is gone.**

**The hard truth:** Looking away for even 3 seconds kills your credibility.

Your competition has figured out how to look polished every time.

**Now you can too.**

## Perfect for every scenario

Whether you're closing a million-dollar deal or recording a quick tutorial, Notchie helps you deliver with confidence.

 VIDEO CALLS

**Sound brilliant on every client call**

Stop fumbling for words when your biggest prospect asks a tough question. Have your value props and closing lines ready to deliver.

 SALES DEMOS

**Close deals with flawless delivery**

Deliver your demo script perfectly every time. Never skip a key feature. Never blank on pricing. Never lose momentum at the close.

 PRESENTATIONS

**Command the virtual room**

When the CEO is watching, you can't afford to stumble. Hit every talking point and look like the leader they need you to be.

 TUTORIALS

**Create content 10x faster**

Stop doing 15 takes. Stop editing out 'ums.' Read your script naturally in one take and move on to your next video.

 JOB INTERVIEWS

**Nail the interview, land the offer**

Have your STAR stories, salary negotiation points, and killer questions ready to deliver with total confidence.

## Built for pros.

Everything you need to deliver a flawless performance, nothing you don't.

### Fits your setup perfectly.

Every screen is different. Adjust the teleprompter width, height, and font size to match your camera position. Change the background opacity to see your meeting notes behind the text.

-  Resizable window
-  Adjustable opacity

### Control at your fingertips.

Use global keyboard shortcuts to adjust scroll speed without losing focus. Or simply hover over the text to pause instantly when you need to improvise.

**SHIFT + ↑** / **SHIFT + ↓** to scroll up or down  
**SHIFT + ←** / **SHIFT + →** to speed up or slow down

 **Universal**  
Works with Zoom, Teams, Meet, OBS.

 **No Account**  
No signup. Just download and run.

 **100% Local**  
Your script never leaves your Mac.

 **Lightweight**  
Native Apple Silicon support.

The Transformation

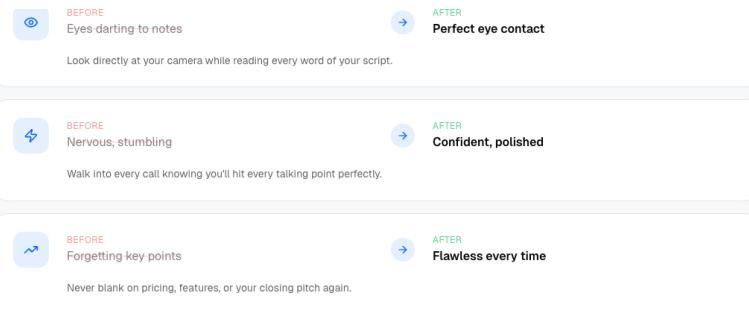

## Before & After Notchie

See the difference a hidden teleprompter makes in your daily workflow.

 BEFORE  
15+ takes per video

 AFTER  
One take, done

Stop wasting hours on re-records. Nail your script the first time.
